

AN INTERNSHIP REPORT
OF
ARTIFICIAL INTELLIGENCE INTERNSHIP

Submitted

To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech (Computer Science and Engineering)

By

Roll Number of Student: 25SCS1003004720

Name of Student: ROAM JHA

Batch: 2025–2029

CANDIDATE'S DECLARATION

I hereby declare that the work presented in this internship report entitled "**Artificial Intelligence Internship**", submitted to the **School of Computer Science and Engineering, IILM University, Greater Noida**, in partial fulfilment of the requirements for the award of the degree of **Bachelor of Technology in Computer Science and Engineering**, is an authentic and genuine record of the original work carried out by me during the period from **02/06/2026 to 02/07/2026**.

I further declare that this internship was undertaken with **Codec Technologies Pvt. Ltd.** under the 1 Month AICTE & ICAC Approved Internship Program. The technical insights, methodologies, problem definitions, workflow formulations, and analyses documented herein represent my own academic and project endeavours completed under proper supervision.

To the best of my knowledge and belief, this report does not contain any material previously submitted for the award of any degree, diploma, or fellowship in this or any other university or institute of higher learning, nor has it been copied or plagiarized from any published source without appropriate attribution.

Student Name:	ROAM JHA
Roll No.:	25SCS1003004720
Program:	B.Tech (Computer Science and Engineering)
Institution:	IILM University, Greater Noida

ACKNOWLEDGEMENT

The successful completion of this internship and the compilation of this comprehensive report would not have been possible without the guidance, encouragement, and support of numerous individuals and institutions to whom I express my sincere gratitude.

First and foremost, I express my sincere appreciation and heartfelt gratitude to **Codec Technologies Pvt. Ltd.** for providing me with the opportunity to pursue the 1 Month AICTE & ICAC Approved Internship Program as an **Artificial Intelligence Intern**. The platform, structured training framework, and industry-oriented tasks assigned during the internship have been immensely valuable in bridging academic foundations with practical computing paradigms.

I would like to extend my deepest appreciation to the **Assigned Project Head(s)**, mentors, and the internship coordination team at Codec Technologies Pvt. Ltd. for their continuous supervision, constructive evaluation, and insightful recommendations throughout the duration of my tenure from 02/06/2026 to 02/07/2026.

I am profoundly grateful to **IILM University, Greater Noida**, and particularly the **School of Computer Science and Engineering**, for fostering an academic curriculum that emphasizes practical industry orientation. I express my sincere thanks to our respected Dean, Head of the Department, and dedicated faculty members whose continuous pedagogical mentorship and academic guidance provided me with the solid conceptual foundation required to carry out this internship effectively.

Lastly, I owe my deepest gratitude to my parents and family members for their unconditional encouragement, moral backing, and endless support throughout my academic pursuits. I also acknowledge my peers and classmates for their valuable discussions and camaraderie.

Student Name:	ROAM JHA
Roll No.:	25SCS1003004720
Program:	B.Tech (Computer Science and Engineering)
Institution:	IILM University, Greater Noida

TABLE OF CONTENTS

Topic	Page No.
1. Candidate's Declaration	i
2. Acknowledgement	ii
3. Internship Completion Certificate & Offer Letter	iii
3.1 Internship Completion Certificate	iii

4.8 Methodology	4
4.9 Expected Outcomes	5
4.10 Certificates of Completion and Communication Proof	5
5. Bibliography/References	7

Note on Academic Pagination: As per standard academic university thesis protocols, preliminary sections (Declaration, Acknowledgement, Official Verification Documents) are marked with Roman numerals (i to v), while the core technical project description and references form the main report body (pages 1 to 7), providing a 12-page comprehensive submission.

3. INTERNSHIP COMPLETION CERTIFICATE

Official Verification Document — Codec Technologies Pvt. Ltd.

INTERNSHIP OFFER LETTER (PAGE 1)

Formal Appointment Documentation — Codec Technologies Pvt. Ltd.

INTERNSHIP OFFER LETTER

Dear Roam Jha,

We are pleased to offer you a 1 Month Internship as Project Intern at Codec Technologies, a global platform dedicated to empowering learners and connecting diverse talent to create meaningful career opportunities worldwide. Codec Technologies delivers dedicated IT and business consultancy services across 27+ countries, empowering global innovation and strategic growth.

Internship Details:

- Designation : Artificial Intelligence Intern
- Location & Mode: Pan India, Hybrid
- Duration : 02/06/2026 to 02/07/2026
- Reporting to : Assigned Project Head(s)

This program provides an immersive experience, enabling you to gain industry-level knowledge and acquire valuable skills. Exceptional interns may also qualify for a scholarship award based on weekly performance reviews conducted by project supervisor.

If you accept this offer and the terms above, please complete your assigned projects and training tasks on our platform and via email.

Best regards,

Sincerely,

Dr. Anurag Shrivastava,

Codec Technologies India

NCS ID: E19E86-0116588288923

Date Of Issue - 02/06/2026

4. PROJECT DESCRIPTION

4.1 Introduction

This internship report provides a structured, formal, and comprehensive account of the professional internship undertaken by the author as an Artificial Intelligence Intern at Codec Technologies Pvt. Ltd. for a duration of 1 Month, spanning from 02/06/2026 to 02/07/2026. The internship program was executed under the recognized 1 Month AICTE & ICAC Approved Internship Program, operating in a Pan India hybrid mode under the direct mentorship and supervision of assigned Project Heads.

As a foundational requirement for the degree of Bachelor of Technology in Computer Science and Engineering (B.Tech CSE) at IILM University, Greater Noida, this industry engagement served as a crucial academic bridge. It allowed the author to transition from theoretical classroom fundamentals to systematic, industry-oriented technical practices in Artificial Intelligence. The primary purpose of this internship was to gain structured practical exposure, develop technical competency through assigned project tasks and training modules, and understand modern engineering paradigms required to solve computational challenges.

4.2 Organization Profile

Codec Technologies Pvt. Ltd. is a globally operating technology and educational enablement organization committed to empowering learners and connecting diverse talent to create meaningful, high-impact career opportunities worldwide. The company provides dedicated Information Technology (IT) and strategic business consultancy services across more than 27+ countries, driving digital transformation, talent enablement, and enterprise technological adoption.

Through its specialized academic alliance programs, Codec Technologies collaborates with leading industry and regulatory bodies—including programs approved under AICTE and ICAC frameworks—to deliver rigorous, industry-aligned internship tracks. The organization focuses on cultivating next-generation competencies in Artificial Intelligence, data management, and modern software paradigms, empowering global innovation and strategic growth for students and engineering professionals worldwide.

4.3 Problem Statement

A persistent and well-documented challenge in contemporary undergraduate engineering education is the dichotomy between conceptual, theoretical coursework and the pragmatic, structured execution demanded by the modern technology industry. While core academic curricula provide comprehensive exposure to underlying mathematical logic, algorithmic principles, and computational foundations, students often lack direct immersion in end-to-end technical project lifecycles.

Within the domain of Artificial Intelligence, this pedagogical gap manifests in several distinct operational areas:

- **Translating Theory into Practice:** Transitioning from abstract textbook definitions to formulating real-world technical problems and decomposing them into solvable analytical tasks.
- **Structured Problem-Solving:** Developing the engineering discipline to systematically analyze requirements, manage constraints, and follow standardized developmental workflows.
- **Industry-Oriented Workflows:** Understanding how technical assignments are evaluated, refined through structured feedback, and formally documented according to professional benchmarks.

4.4 Project Objectives

The internship was structured around well-defined academic and professional milestones designed to foster technical competence, analytical reasoning, and disciplined engineering execution. The specific objectives governing the 1-month tenure included:

- **Conceptual Consolidation:** Developing a robust, practical understanding of foundational Artificial Intelligence concepts, operational paradigms, and algorithmic principles.
- **Analytical Problem-Solving:** Strengthening computational thinking, algorithmic logic, and programming proficiency through structured task decomposition.
- **Execution of Assigned Tasks:** Successfully executing the training modules, practical assignments, and technical milestones designated by the Project Head within stipulated deadlines.
- **Project-Based Learning Experience:** Cultivating experiential competency by applying academic theoretical principles directly to structured, project-oriented scenarios.
- **Technical Documentation:** Enhancing proficiency in technical communication, architectural representation, and formal engineering report compilation.
- **Professional Workflow Mastery:** Understanding standardized industry workflows, lifecycle milestones, iterative review cycles, and performance evaluation mechanisms.

4.5 Scope of the Project

The operational scope of the internship encompasses a holistic learning and implementation framework within the domain of Artificial Intelligence:

- **Domain Learning Scope:** Systematic exploration of Artificial Intelligence foundations, knowledge representation, data preprocessing necessities, and computational learning models.
- **Training Scope:** Structured engagement with the digital learning curriculum and technical modules curated under the AICTE & ICAC approved program guidelines.
- **Task Execution Scope:** Analysis of technical specifications, formulation of algorithmic strategies, implementation of assigned assignments, and verification of output correctness.
- **Documentation Scope:** Comprehensive compilation of technical observations, workflow architectures, methodology summaries, and academic reporting aligned with IILM University standards.
- **Professional Development Scope:** Developing professional discipline in adhering to timelines, responding constructively to feedback, and demonstrating ethical engineering practices.

4.6 Technologies and Tools Used

To ensure strict academic integrity, the technical environment utilized during the internship is categorized based on the core functional pillars supporting the learning track:

FUNCTIONAL DOMAIN	TECHNICAL LEARNING ENVIRONMENT & TOOLSETS
Core Domain	Foundational AI principles, problem formulation methods, rule-based logic, and learning models.
Programming & Logic	Algorithmic problem-solving frameworks, pseudocode structuring, and programming logic.
Learning Platform	Codec Technologies digital learning portal, modular technical curricula, and instructional modules.
Documentation & Design	Structured technical documentation suites, workflow design schemas, and academic reporting tools.
Communication	Hybrid project coordination channels, mentor review systems, and milestone tracking platforms.

4.7 System Architecture

The operational and learning workflow executed during the 1-month Artificial Intelligence internship followed a highly structured, sequential engineering architecture:

WORKFLOW PHASE	OPERATIONAL DESCRIPTION & DELIVERABLES
Phase 1: Orientation	Onboarding, briefing on program guidelines, introduction to the digital learning portal, and review of internship expectations.
Phase 2: Task Understanding	Detailed examination of assigned Artificial Intelligence modules, problem boundaries, and evaluation metrics.
Phase 3: Requirement Analysis	Synthesizing required algorithmic approaches, structuring necessary logic, and identifying design constraints.
Phase 4: Implementation	Executing programming assignments, synthesizing module outcomes, and formulating solutions.
Phase 5: Review & Feedback	Submission of intermediate tasks to Assigned Project Head(s), incorporating critique, and refining solutions.
Phase 6: Documentation	Final compilation of technical findings, validation against objectives, and generation of formal academic report.

4.8 Methodology

The technical methodology adopted throughout the internship was rooted in a structured, phased pedagogical model:

- 1. Orientation & Scoping:** Familiarization with Codec Technologies' operational standards and AICTE/ICAC guidelines.
- 2. Theoretical Learning:** Systematic progression through designated AI learning tracks and computational models.
- 3. Task Decomposition:** Breaking down broad problem statements into modular, manageable components.
- 4. Iterative Implementation:** Translating concepts into concrete solutions and verifying intermediate results.
- 5. Quality Review:** Submitting outcomes for project head assessment and refining logic structure.
- 6. Final Synthesis:** Consolidating all project outcomes and preparing formal documentation for academic submission.

4.9 Expected Outcomes

The successful completion of the 1-month Artificial Intelligence internship yielded tangible academic and technical learning outcomes aligned with the educational objectives of the B.Tech CSE program:

- **Mastery of Core AI Fundamentals:** Acquisition of a coherent, practically oriented understanding of foundational Artificial Intelligence paradigms and problem formulations.
- **Enhanced Analytical Thinking:** Significant advancement in the ability to critically dissect computational problems and structure logical solution pipelines.
- **Practical Project Exposure:** Direct experience in navigating project constraints, delivery schedules, and execution of milestone-driven deliverables.
- **Theory to Application Bridge:** Successfully correlated theoretical computer science concepts taught in university classrooms with practical implementations.
- **Industry Workflow Acumen:** Appreciation of professional project execution lifecycles, iterative review mechanisms, and corporate engineering standards.
- **Technical Documentation Excellence:** Developed competency in structuring, authoring, and presenting formal academic and technical reports.

4.10 Certificates of Completion and Communication Proof

As formal documentation of satisfactory completion, the primary verification artifacts issued by Codec Technologies Pvt. Ltd. have been placed in Chapter 3 of this report:

- **Internship Completion Certificate:** Presented on Page 5 (Section 3.1), confirming successful completion of the 1-month Artificial Intelligence Internship.
- **Official Internship Offer Letter:** Presented across Pages 6 and 7 (Sections 3.2 and 3.3), detailing the terms of appointment, institutional verification, and scope of engagement.

Student Name	ROAM JHA	Roll Number	25SCS1003004720
Academic Stream	B.Tech (CSE)	Batch	2025–2029
Institution	School of Computer Science and Engineering, IILM University, Greater Noida		
Host Organization	Codec Technologies Pvt. Ltd.	Role Designation	AI Intern
Tenure Dates	02/06/2026 to 02/07/2026	Accreditation	AICTE & ICAC Approved

5. BIBLIOGRAPHY/REFERENCES

The compiling of this internship report and the academic-technical studies conducted throughout the duration of the internship utilized the following primary corporate records, institutional guidelines, and foundational academic references:

- 1. Codec Technologies Pvt. Ltd.**, Formal Internship Offer Letter & Terms of Engagement, Ref No. CT-HR/AI-INT/2026/4720, Issued: May 2026, New Delhi, India.
