

INTERNSHIP REPORT PRESENTATION

ARTIFICIAL INTELLIGENCE INTERNSHIP

Roam Jha — B.Tech CSE, IILM University, Greater Noida · Batch 2025–2029

June – July 2026 · Codec Technologies Pvt. Ltd.

Slide 1 · Cover

ABOUT THE STUDENT

STUDENT NAME

Roam Jha

PROGRAMME

B.Tech – Computer
Science &
Engineering

INSTITUTE

IILM University,
Greater Noida

BATCH

2025–2029

INTERNSHIP DOMAIN

Artificial
Intelligence

DESIGNATION & DURATION

Artificial
Intelligence Intern
· 1 Month · 02 June
– 02 July 2026

ABOUT THE ORGANIZATION

Summary based on the official offer letter from Codec Technologies. Concise, factual company positioning drawn from the uploaded document.

GLOBAL REACH

27+ countries

CAREER DEVELOPMENT

Connecting diverse talent with meaningful career opportunities

IT & BUSINESS CONSULTANCY

Dedicated IT and business consultancy services

GLOBAL INNOVATION

Supporting innovation and strategic growth initiatives

Codec Technologies is presented in the official offer letter as a global platform focused on empowering learners and connecting diverse talent with career opportunities while delivering consultancy services across multiple geographies.

BRIDGING ACADEMIC LEARNING WITH PRACTICAL AI

Purpose: Provide a structured environment for a B.Tech CSE student to translate theoretical AI concepts into project-based practical skills, develop problem-solving ability, and learn professional workflows through assigned tasks and mentorship.

INTERNSHIP OBJECTIVES

O1 — AI FUNDAMENTALS

Develop a practical understanding of core Artificial Intelligence concepts.

O2 — TECHNICAL LEARNING

Strengthen technical knowledge relevant to AI and computing principles.

O3 — PROJECT- BASED LEARNING

Complete assigned internship projects and hands-on technical tasks.

O4 — PROBLEM SOLVING

Apply logical and analytical thinking to solve practical problems.

O5 — PRACTICAL APPLICATION

Translate theoretical knowledge into real-world project requirements.

O6 — PROFESSIONAL DEVELOPMENT

Improve documentation, communication, task management, and workplace practices.

TECHNICAL LEARNING AREAS

Note: Specific tools, languages, datasets, or frameworks were not specified in the provided documents. The following lists the learning focus areas encountered during the internship without attributing specific software or libraries.

Artificial Intelligence

Conceptual understanding of AI principles and application scenarios.

Programming & Logic

Algorithmic thinking, control structures, and computational problem solving.

Data & Analytical Thinking

Interpreting structured information, logical analysis, and result validation.

Project-Based Learning

End-to-end task completion and applying concepts to produce deliverables.

Technical Training

Instructor-led or mentor-led sessions to build domain competence.

Problem Solving

Analytical approaches to break down and address assigned tasks.

INTERNSHIP WORKFLOW

STAGE	DESCRIPTION	FLOW
ORIENTATION	Understanding internship structure, expectations, deliverables, and assigned activities.	Intro →
TRAINING	Structured learning sessions and guided instruction to build foundational knowledge.	Learn →
TASK UNDERSTANDING	Analyze assigned problems, define scope, and prepare implementation plans.	Plan →
IMPLEMENTATION	Apply technical knowledge to complete tasks and develop deliverables under supervision.	Build →
REVIEW & FEEDBACK	Present work, receive evaluations, iterate on improvements based on mentor feedback.	Refine →
COMPLETION	Finalize deliverables, document outcomes, and summarize learning takeaways.	Deliver

A clear stage-wise flow ensured structured learning and measurable progress throughout the one-month internship.

THE 4-WEEK LEARNING JOURNEY

WEEK 1 — ORIENTATION & AI FOUNDATIONS

Understand expectations, overview of AI concepts, and initial task assignments.

WEEK 2 — TECHNICAL TRAINING & TASK UNDERSTANDING

Focused learning sessions and analysis of project requirements.

WEEK 3 — PROJECT IMPLEMENTATION

Execute assigned project tasks and iterate with mentor feedback.

WEEK 4 — COMPLETION & REVIEW

Finalize deliverables, consolidate learning, and prepare documentation.

SKILLS & CAPABILITIES DEVELOPED

Understanding of AI fundamentals

Conceptual clarity on core AI topics relevant to undergraduate studies.

Improved technical problem-solving

Applied analytical approaches to decompose and address assigned tasks.

Practical project exposure

Hands-on experience completing structured project activities.

Analytical & logical thinking

Enhanced ability to reason through technical challenges methodically.

Structured task execution

Experience with stepwise implementation and documentation practices.

Professional workflows

Familiarity with review cycles, feedback incorporation, and delivery expectations.

Communication & documentation

Improved clarity in reporting progress and writing concise technical notes.

Confidence applying academics practically

Stronger readiness for future project work and internships.

INTERNSHIP CERTIFICATION

Credential Summary

STUDENT NAME Roam Jha

ORGANIZATION Codec Technologies Pvt. Ltd.

ROLE Artificial Intelligence Intern

DURATION 02/06/2026 – 02/07/2026

PROGRAM 1 Month · AICTE & ICAC Approved Internship Program

Official certificate verified and provided by the host organization (see image).
